The Applicant's claimed invention is deemed allowable over the prior art as the prior art fails to teach or fairly suggest determining the distance between a seismic sensor and a positioning device using an airborne acoustic transmission between the positioning device and the seismic sensor, wherein the positioning device and the seismic sensor are elements of a seismic survey.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6,791,901 B1 discloses a method for conducting a seismic survey in which sensors are provided within a tetrahedral volume.

US Patent 6,760,275 B2 discloses a communication system, within a wellbore or seismic environment, that uses microphones for acoustic detection.
